

PATENT
Serial No. 09/786,102
Amendment in Reply to Office Action mailed on March 22, 2006

NEW ABSTRACT

A device reads an information carrier that carries identification and user information. The identification information is arranged so as to be spread over the information carrier and includes data and parities. The device includes a reader for reading the information from the information carrier and error corrector correcting errors in the information. The device further includes an organizer for organizing the information in such a way that both the identification and user information can be processed by the error corrector.
